CACI Ultra Treatment

CACI award winning treatments regularly capture media headlines, have a huge celebrity following and have been voted the most effective anti-ageing treatment available.

CACI Ultra incorporates 4 different technologies within one treatment. Micro-current will stimulate the facial muscles, providing tone and definition to the face. Ultrasonic skin peeling removes superficial impurities from the skin's surface. Intensive micro massage invigorates the circulation and blood flow to the area, increasing tissue oxygenation.

Advanced LED light therapy specifically targets deep lines and wrinkles and provides a non-invasive alternative to collagen injections.

Results can be seen immediately. However we strongly advise a course of 10-15 treatments for maximum, long lasting results. On completing your course, monthly maintenance is advised to maintain your results.

30 minutes Ultra Healing Treatment

Designed to treat **acne & blemished skins** and reduce the appearance of non-pathological **pigmentation** (chloasma), this treatment may be carried out anywhere on the body, but is exceptionally effective for **congested spotty backs & chests**. Deep cleansing of the skin is carried out using ultrasound, the specially modulated frequencies working to **destroy bacteria & rid the skin of impurities**. Micro-current is then used to apply ETR (**Enhancement of Tissue Repair**), **this being especially efficacious in the reduction of acne, blemishes & any scarring**. Blue light laser is then used to **calm any inflammation & destroy the bacteria** causing the blemishes. A specific resonance of ultrasound is then used in combination with a specially formulated healing gel to accelerate the healing of **blemishes & stimulate** the cells responsible for the repair of damaged skin tissue.
